

1. Download Eclipse

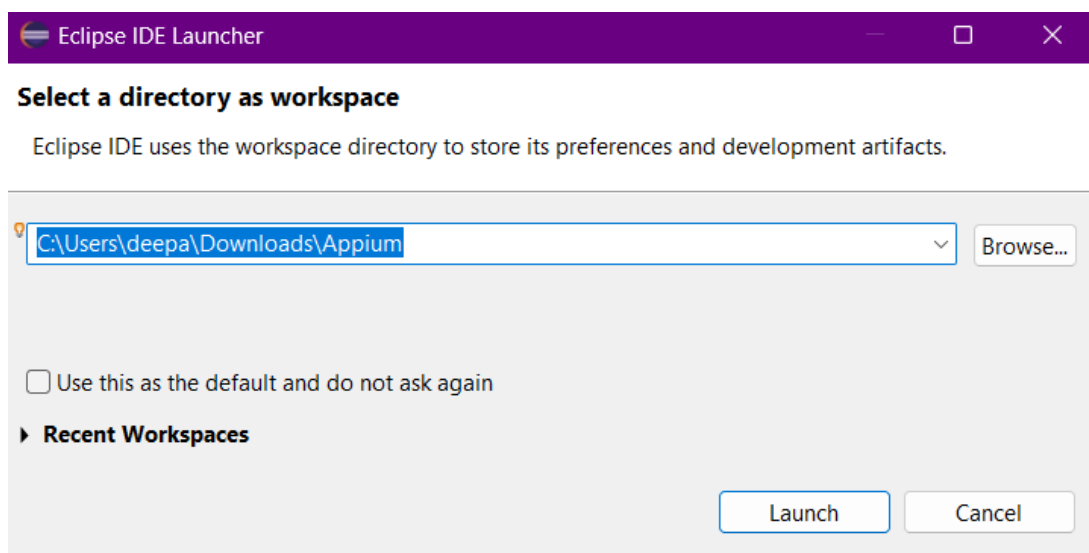

1. Open: <https://www.eclipse.org/downloads/>
2. Download **Eclipse IDE for Java Developers** (Windows x64).

2. Install Eclipse

1. Right-click the downloaded installer → **Run as administrator**

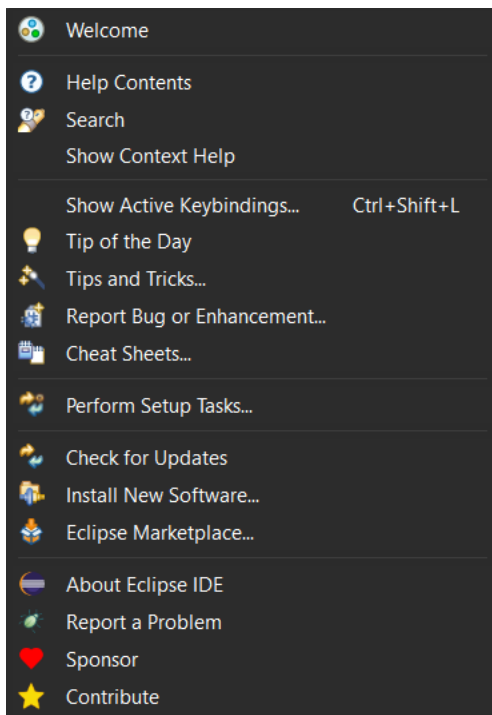

2. Select **Eclipse IDE for Java Developers**
3. Choose installation folder: e.g., C:\Appium\Eclipse

4. Click **Install** → Wait for completion → **Launch** Eclipse

3. Install Maven Plugin in Eclipse

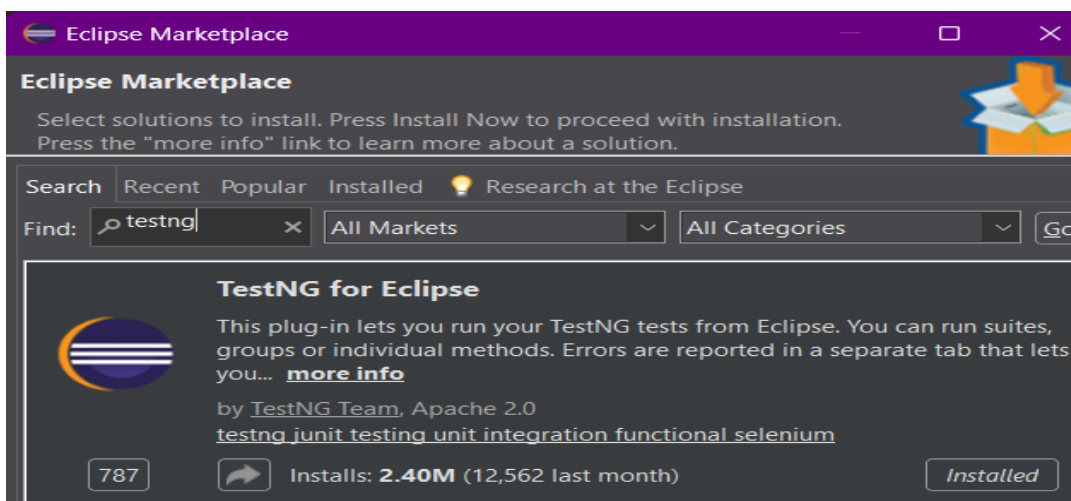

1. Open Eclipse → Go to **Help** → **Eclipse Marketplace...**

- 2.
3. In the **Find** box, type maven → Press **Enter**
4. Locate **Maven Integration for Eclipse (m2e)** → Click **Install**
5. Follow prompts → Accept license → Click **Finish**
6. Restart Eclipse when prompted

4. Install TestNG Plugin in Eclipse

1. Open Eclipse → Go to **Help** → **Eclipse Marketplace...**
2. In the **Find** box, type TestNG → Press **Enter**

3. Locate **TestNG for Eclipse** → Click **Install**
4. Follow prompts → Accept license → Click **Finish**
5. Restart Eclipse when prompted

5. Verify Installation

1. Open Eclipse
2. Go to **Window** → **Preferences** → **Maven** → Verify Maven is listed
3. Go to **Window** → **Preferences** → **TestNG** → Verify TestNG is listed
4. Optional: Create a sample Maven + TestNG project to ensure everything works
