

TECHNICAL SAFETY REQUIREMENT

Factors	AUTOSAR Layer
Speed sensor, Camera, GPS, Radar	ECU Sensors (HW)
Speed check, Driver state logic, Collision logic	Application SWCs
Data exchange	RTE
Diagnostics, Time, Communication module, Memory	BSW Services
Input/output access	MCAL

Sensors → collect data
MCAL → reads it
BSW → manages it
RTE → transfers it
Application → decides
Safety block → verifies
Command → goes back to the brake or warning system.
