

1. Download Node.js

1. Open: <https://nodejs.org/en/download/>
2. Download **Windows x64 Installer (.msi)**

2. Install Node.js

1. Run the downloaded .msi file
2. Keep default installation path:
C:\Program Files\nodejs
3. Click **Next** → **Install** → **Finish**

3. Open Environment Variables

1. Right-click **This PC** → **Properties**
2. Click **Advanced system settings**
3. Click **Environment Variables**

4. Create NODE_HOME

1. Click **New** under **System variables**
2. Variable Name: **NODE_HOME**
3. Variable Value: **C:\Program Files\nodejs**
4. Click **OK**

5. Update Path

1. Select **Path** → Click **Edit**
2. Add:
C:\Users\deepa\AppData\Roaming\npm
3. Click **OK** → **OK**

6. Verify Node.js Installation

1. Open **Command Prompt**

Run:

```
node -v  
npm -v
```

2. Confirm Node.js and npm versions are displayed
